

Better Patient Care Through Privacy

Hospital for
Special Care

We Rebuild Lives.

Your Privacy Matters

We are taking active measures to protect your privacy. Partnering with a company called FairWarning® to conduct patient privacy monitoring, we receive alerts if suspicious activity is detected. We believe that, by providing excellent patient care, we will continue to be your provider of choice.

HSC Patients

- Our patients come first
- Your trust in your care providers has a direct impact on the quality of care provided. When this trust is broken, it is impossible to deliver the best care
- We are protecting your information so that you will have the confidence to:
 - Share your most sensitive information
 - Seek care early and often, leading to faster and better outcomes
- Our core beliefs include a duty to protect your information

HSC Employees

- Only access patient health information when you have a business need
- Only access the minimum necessary information to perform your job
- Know the policies regarding accessing your own family members' records
- *Employees are our patients too!* By working together to build a culture of privacy, we want to assure our employees that your health information is protected. Your trust and confidence in seeking care in our facilities helps keep our benefits cost down, allowing us to remain competitive in our community.

Worried about your privacy?

If you have concerns, please send an email to PrivacySecurityOffice@hfsc.org or call 860.827.4822.
