

Audience: All HFSC Clinical Staff

Resources:

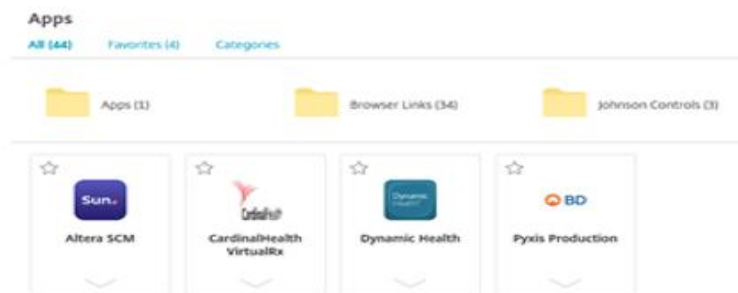

Dynamic Health as an evidence-based tool that is designed to help clinical staff improve patient outcomes and ensure confidence in practice. This resource is a way to obtain fast answers and foster a culture of excellence in practice and critical thinking leading to improved patient outcomes.

Dynamic Health will supplement our traditional procedure system (Symplr)

What does this mean: when looking for a policy and procedure and unable to locate access dynamic health and search key words to find the most up to date references and guidelines, aiding in provide high quality safe care.

Dynamic Health is not replacing Symplr it is an additional resource for our clinical staff

Staff can now access Dynamic Health by accessing HSC Storefront (Citrix), then selecting the Dynamic Health Icon.

Dynamic Health Can be used to review:

1. Skills – step by step illustrated guides and checklists
2. Learn about Diseases and Conditions
3. Signs and Symptoms
4. Tests and Labs
5. Care Interventions – Treatments and actions
6. Leadership Content
7. Patient Handouts
